EDUCATION AS CHANGE DRIVER

2016

This year our Social Responsibility program focused on the distribution of educational books at the Escuela Brasil in Santa Ana, San José, Costa Rica.

On this occasion we had the opportunity to deliver the books of all the subjects for the 159 students of the school that range from preschool to 6th grade, in a morning full of joy and an enjoyable sharing with the students and other members of this institution. We hope that this contribution will help all these children of different ages to have an increasingly strong educational base, in order to achieve the academic success that we all deserve.
